# OLIMEXINO-NANO

Open source hardware wearable Arduino Leonardo-like development board with ATmega32U4

FEATURES

ATMEGA32U4 Arduino Leonardo compatible

Works with Arduino IDE

Micro USB cable connector (unlike most of the other Olimex boards which use mini USB)

User button

Reset button

Micro SD card connector

Two stackable connectors

UEXT connector for connection to OLIMEX UEXT modules

Intelligent power supply can take power from USB or external LiPo battery (OLIMEXINO-BAT module)

Ultra low power design for battery and handheld operations
